Green jobs for sustainable development:

In the promotion of sustainable development, the quantity and quality of jobs represent both an objective and an essential ingredient. While in the shift to a greener economy employment net gains have proved to be possible, it is also becoming evident that the goal of environmentally sustainable and social inclusive economies cannot be achieved without the proactive contribution of the world of work. This is why the ILO, through the promotion of green jobs, emphasizes the central role of employment and the workplaces as the locus for a better integration between the three dimensions of sustainable development.

Jobs are understood as “green” when they help reduce negative environmental impact, ultimately leading to environmentally, economically and socially sustainable enterprises and economies. The ILO stresses that green jobs are also decent jobs that provide adequate incomes, social protection and ensure the respect for the rights of workers.

More specifically, decent green jobs:
- Improve energy and raw materials efficiency
- Limit greenhouse gas emissions
- Minimize waste and pollution
- Protect and restore ecosystems
- Support adaptation to the effects of climate change

Building from this definition, the course provides an interactive e-learning opportunity to become knowledgeable about the key concepts and emerging practices in the promotion of green jobs for sustainable development.

Target audience

The course is addressed to a mixed audience of professionals interested in the basic concepts of green jobs, its linkages with the ILO agenda and the sustainable development framework. This includes the representatives from Governments, Employers’ Organizations, Trade Unions, national and international development agencies, civil society organisations and development practitioners.

Learning objectives

The overall objective of this course is to improve the understanding of green jobs key concepts and definitions as part of the contribution of the world of work to sustainable development, through a review of tools, selected literature and on-going practices.

Course structure and content mapping

The course is structured around 4 learning modules, addressing 4 fundamental questions:
- WHY are green jobs key to sustainable development?
- WHAT is exactly a green (and decent) job?
- WHERE can green jobs be found and/or created?
- HOW can green jobs be promoted and by whom?

More concretely, the following contents will be tackled:

- Concepts and practices
- Defining challenges of the XXI century
- Sustainable development: concept and evolution
- Towards a green economy
- The ILO contribution to sustainable development
- Working and statistical definitions
- Shades of green
- The employment shift
- Social inclusion and gender equality
- Green jobs in:
  - Agriculture
  - Energy
  - Buildings
  - Forestry
  - Manufacturing
  - Transportation
  - Fisheries
  - Recycling
  - Agriculture
  - Energy
  - Buildings
  - Forestry
  - Manufacturing
  - Transportation
  - Fisheries
  - Recycling
- Policies, programmes and strategies at national and local level:
  - Labour market assessments
