The Partnership for Action on Green Economy (PAGE) supports countries that are interested in making the transition towards more inclusive economies, use resources more efficiently and have lower carbon emissions.

Between today and 2020, PAGE will catalyze the change process of the economies of 20 countries, focusing on investment and public policies to create new ways of generating resources, cleaner technology, healthy ecosystems and skilled green jobs driven by strong institutions and good governance. Together, this partnership will create the conditions for increasing prosperity and greater equality, contributing to natural resources conservation and poverty eradication.

The vision of PAGE is to contribute to the equitable and sustainable transformation of the national economic structures of 30 countries by 2020, with the ultimate aim of achieving environmental sustainability, creating decent jobs and improving human wellbeing, recognizing that each country must follow its own path towards sustainable development.

The countries involved will have access to a wide range of high-quality resources and advisory services regarding key factors of the green economy.

To make this possible, PAGE will focus on developing and providing global access to green economy tools and training programmes.

Offering practical tools and advisory services to mobilize financial resources and implement green economy actions;
Offering advisory services on international cooperation mechanisms, support for policy owners, in particular on technical assistance, financial instruments, green finance, and public private partnerships;
Offering policy-oriented and evidence-based experts in the field of green economy);
Offering value-added research and analysis on the green economy, particularly on the role of public and private sector actors in the green economy.

Creating and sharing knowledge about the green economy to promote its implementation regionally, nationally.

Understanding the various roles played by different actors in the green economy, including policy makers, financial institutions, and businesses;

Developing a network of global and sectoral indicators for national green economy measurement;

Promoting events and projects that engage with PAGE partners and other stakeholders to enhance the implementation of the green economy.

OPENING THE WAY TO SUSTAINABLE DEVELOPMENT AND POVERTY ERADICATION.

ENABLING THE COUNTRIES TO MOVE TOWARDS INCLUSIVE GREEN ECONOMIES.

NGO of Nigeria provides an overview of the global knowledge base and will further accelerate sustainable green economy development through their support.

The main and long-term objective of PAGE in Peru is to contribute to national development planning strategies, mainstreaming the concept of green growth into development policies through the design of public policy proposals in key sectors of the economy that will promote the efficient use of resources, environmental quality and sustainability and green job creation, as well as the instruments needed for their implementation.

To launch the PAGE intervention in Peru, an initial phase of one year has been proposed, whose main objective is to support the Peruvian government in identifying the basic elements to build a development model based on the paradigm of green growth. The proposed activities during this phase match the four global PAGE components.
