FORUM ON PARTNERSHIPS FOR INCLUSIVE GREEN ECONOMY: JOINING UP FOR DELIVERY ON THE 2030 AGENDA

Wednesday, 25 May 2016, 12:00-13:45
United Nations Environment Assembly (UNEA-2)
Nairobi, Kenya
EVENT SUMMARY

Both the UN system and national governments have recognized that achieving the goals and targets for the 2030 Agenda will require collaboration across sectoral and institutional boundaries and to embrace a more integrated and coherent approach. Sustainable Development Goal (SDG) 17, in particular, calls for innovative partnerships to build synergies across silos of expertise.

The Partnership for Action on Green Economy (PAGE), the Green Growth Knowledge Platform (GGKP), the UNDP-UNEP Poverty-Environment Initiative (PEI), the 10 Year Framework of Programmes on Sustainable Consumption and Production patterns (10YFP), and the United Nations Collaborative Programme on Reducing Emissions from Deforestation and Forest Degradation in Developing Countries (UN-REDD Programme), will exemplify how UN agencies and other partners can work together across mandates, expertise and networks to offer integrated and holistic support to countries on inclusive and sustainable growth.

The event will draw on growing evidence that has emerged from countries about economic, social and environmental benefits that a transition to an inclusive green economy and sustainable consumption and production patterns offers for securing the SDGs.

CO-HOSTS

H.E. Kimmo Tiilikainen
Minister of Agriculture and the Environment, Finland
