The Partnership for Action on Green Economy (PAGE) supports countries that are interested in making the transition towards more inclusive economies, use resources more efficiently and lower carbon emissions. Between today and 2020, PAGE will catalyze the change process of the economies of 20 countries, focusing on investment and public policies for creating new ways of generating resources, cleaner technology, healthy ecosystems and defend green jobs driven by strong institutions and good governance. Together, this partnership will create the conditions for increasing prosperity and greater equity, contributing to natural resources conservation and poverty eradication.

A GREEN ECONOMY IS THE OUTCOME OF IMPROVED HUMAN WELLBEING AND SOCIAL EQUITY, WHILE SIGNIFICANTLY REDUCING ENVIRONMENTAL IMPACT.

THE GLOBAL VISION OF PAGE IS TO CONTRIBUTE TO THE EQUITABLE AND SUSTAINABLE TRANSFORMATION OF THE NATIONAL ECONOMIC STRUCTURES OF 30 COUNTRIES BY 2020, WITH THE ULTIMATE AIM OF ACHIEVING ENVIRONMENTAL SUSTAINABILITY, CREATING DECENT JOBS AND IMPROVING HUMAN WELLBEING, RECOGNIZING THAT EACH COUNTRY MUST FOLLOW ITS OWN PATH TOWARDS SUSTAINABLE DEVELOPMENT.

OPENING THE WAY TO SUSTAINABLE DEVELOPMENT AND POVERTY ERADICATION.

ENABLING THE COUNTRIES TO MOVE TOWARDS INCLUSIVE GREEN ECONOMIES.

PAGE is one of the international partnerships in the global knowledge base that will help broaden noticeably to green economy look through, tools and guidance.

The countries involved will have access to a wide range of high-quality resources and advisory services concerning key factors of the green economy.

To make this possible, PAGE will focus on developing and improving national, regional and local training programmes by:

- Offering handbooks, tools, methodologies and technical sessions for policy makers, students and other stakeholders.
- Providing PAGE Member countries with technical support.
- Providing specific tools and strategies to access to market updated resources.

Creating and sharing knowledge about the green economy to promote its implementation nationwide, through:

- Understanding research and analysis to improve existing green economy modules and methodologies.
- Developing a series of global and sector indicators for national green economy assessment.
- Organising events for sharing knowledge with PAGE partners and developing high-level dialogue about national and global public policies.
The main and long-term objective of PAGE in Peru is to contribute to national development planning strategies, mainstreaming the concept of green growth into development policies through the design of public policy proposals in key sectors of the economy that will promote the efficient use of resources, environmental quality and sustainability and green jobs creation, as well as the instruments needed for their implementation.

To launch the PAGE intervention in Peru, an initial phase of one year has been proposed, whose main objective is to support the Peruvian government in identifying the basic elements to build a development model based on the paradigm of green growth. The proposed activities during this phase will match the four global PAGE components.

In response to the call to action of the Rio+20 Declaration entitled "The Future We Want", which urges the United Nations system to support the countries interested in making the transition to more inclusive green economies, the United Nations agencies – UNDP, UNICEF, UNCTAD, UN-Habitat and UNOPS – have come together to form the Partnership for Action on Green Economy (PAGE), to address the growing demands of the countries interested in pursuing national green economy strategies.

OUTCOMES OF THE INITIAL PHASE OF PAGE FOR PERU (2014)

- Support for the government in identifying priority areas for green growth in Peru through a scanning exercise.
- Support to the government in the design and preparation of green policy and the national economic and environmental mainstreaming process in a national context.
- Support for the government in identifying and mobilizing key stakeholders and key rules of the game in development models in order to promote green growth strategies.
- Support for the government in developing a national strategy for green growth that, as an input, will be used in the elaboration of plans and policies that will allow economic and social development with social inclusion and employment, while enabling the sustainable use of Peru's natural resources and capital.

PAGE will support efforts through training, advising and mentoring that will lead to the participation of society as a whole, with the required institutional and social government buy-in, i.e., through multisectoral articulation mechanisms, as well as through improving the perception, political and social capital of government. The participation of civil society is essential if action is to be considered legitimate. This process will start with the participation of researchers, workers, trade unions, academia and civil society, as well as help its transition to be seen by many others as a model of sustainable society.

The United Nations Environment Programme (UNEP) has organized a UN conference on green economy that discusses the global environment and is supported by a 10-year implementation plan of the concept of PAGE.

The International Labour Organization (ILO) is a partner in the development of PAGE in fostering knowledge and experience on the roles of labour, enterprise, green jobs, gender equality and decent work.

The United Nations Industrial Development Organization (UNIDO), with its expertise on industrialization and its implementation through industrial policies, will assist the framework for industry and public private partnerships.

The United Nations Development Programme (UNDP) will be in the process of knowledge building and promoting national mechanisms and engaging public policies.

The United Nations Institute for Training and Research (UNU-I版权声明) will provide support and coordinate international training programs, including housing the PAGE coordination office.

The United Nations Environment Programme (UNEP) will support and coordinate integration efforts, including housing the PAGE coordination office.

Since green economy planning and decision making with United Nations system in the society, government, the policy makers and leaders of the financial and private sector, as well as civil society, the climate and a global economic transition is included.

The existing initiatives and experience of the key agencies will result in the power of PAGE being ten times the size of its parts.
